NOVIC-DJEF MELATAGUIA TONLEU

contact@novic.dev | +1 418 350 7343 | Sept-Îles, QC G4R 1J5

🎓 Professional Summary

Passionate Full Stack Developer with 3+ years of experience, specializing in the React.js/React Native ecosystem and Node.js back-end development. Proven track record in building scalable mobile and web applications with modern technologies such as Next.js, Prisma ORM, and PostgreSQL. Proven track record in CI/CD implementation and automated deployment processes. Proficient in Agile methodologies and remote collaboration, with a specialization in building high-performance, user-centric applications that combine technical excellence with exceptional user experience.

🛠️ Core Competencies

Frontend & Mobile: React.js, Next.js, React Native (Expo & CLI), Tailwind CSS, Redux, TypeScript, JavaScript (ES6+)
Backend & Database: Node.js, Express.js, RESTful APIs, Prisma ORM, PostgreSQL, MySQL
DevOps & Tools: Git, GitHub Actions, CI/CD Pipelines, Jira, VPS
Additional Skills: Push Notifications, Geolocation Services, Biometric Authentication, AI Integration, Payment Processing (Stripe)

💼 Professional Experience

Freelance | Quebec, Canada
React Native Developer
03/2025 – Current

- Architected and developed a comprehensive food delivery ecosystem consisting of 3 interconnected applications:
  - Customer Mobile App (React Native/Expo): Built intuitive restaurant discovery and ordering system with real-time notifications, rating system, and delivery tracking
  - Driver Mobile App (React Native/Expo): Developed driver-focused application with order management, geolocation integration, and push notification system
  - Admin Web Platform (React.js/Next.js): Created comprehensive restaurant management dashboard with analytics, order tracking, and global platform administration
- Backend Infrastructure (Node.js/Express/Prisma): Designed robust API architecture with PostgreSQL database, implemented secure authentication, payment processing, and real-time data synchronization
- Implemented CI/CD pipelines using GitHub Actions for automated testing and deployment across web and mobile platforms
- Integrated Redux for state management across all applications
- **PROJECT 1:** Kousier - Food Delivery Platform (Full Stack Project)

Freelance | Quebec, Canada
React Native Developer
01/2025 – 03/2025

- Developed sophisticated car rental application for French market with AI-powered chat system for instant customer support
  - Customer Interface: Built advanced filtering system for comparing and booking vehicles
  - Owner Dashboard: Created admin panel to manage listings, track analytics, and monitor pricing strategies

    - AI Integration: Integrated chatbot for automated customer assistance
    - Notification System: Implemented real-time updates for customers and staff
    - Verification System: Built secure workflow for ID validation and approval
- **PROJECT 2:** RaphyCar - AI-Powered Vehicle Rental Platform

Freelance | Quebec, Canada
React Native Developer
01/2025 – 03/2025

- Developed comprehensive medication reminder application using React Native (Expo) with biometric authentication (Face ID/Touch ID)
- Built asynchronous storage system with push notifications for timely medication reminders
- Established CI/CD pipeline with GitHub Actions for automated Play Store deployment
- **PROJECT 3:** Reminder - Medication Management App

iLink World Corporation | Douala, Cameroon
React Native Developer
11/2022 – 12/2024

- Developed and maintained fintech/insurtech mobile applications for international money transfers and health insurance payments across Africa
- Built iLinkCity - municipal tax collection platform for local business tax payments via mobile
- Implemented new features using React Native cli, Redux, Stripe, push notifications, and geolocation
- Collaborated with cross-functional teams to deliver scalable mobile solutions across multiple African markets

🌍 Languages

English: Fluent (Professional Working Proficiency) **French:** Native

🎓 Education

Institut Universitaire de la Côte | Douala, Cameroon
Bachelor's Degree in Software Engineering 01/2023
(WES Evaluated - Equivalent to U.S. Bachelor's Degree)

Institut Universitaire du Golfe de Guinée | Douala, Cameroon
Associate Degree in Software Engineering 01/2022

🚀 Hobbies and Interests

Travel, Sports, Volunteer Work with Non-Profit Organizations
